VALLEEVEUE TEST GARDEN *Gladiolus* TRIALS 1951

The Valleeveue Test Garden Trials are the most comprehensive, exacting and authoritative *Gladiolus* Trials in America. And we have found their ratings to be so reliable that Every Variety we list (American or Dutch) is checked against full detailed trial reports. In this way, we are absolutely sure of performance and quality under average American climatic conditions, as well as the relationship of quality compared with all other varieties on the market!

The following information is quoted directly from the Test Garden Report for 1951

"This summer, as we evaluated the 359 varieties submitted for trial, one fact became evident early in the season, and as the season progressed it became alarming: 'Where are the outstanding new introductions of 1951-52?'

"Our travels to the gladiolus shows, 13 in all, soon bore our own fears for 1951. New varieties of merit are few and far between. As usual, those of former years still show their merit as they consistently won major awards. Boldface, Patrol, Strathnaver, Florence Nightingale, Spic and Span, Evangeline, Red Charm and others are still tops.

"In 1947 Strathnaver from Australia, the super exhibition white; Boldface, spectacularly marked deep salmon, and chaste white Florence Nightingale vied for honors with K&M's Pactolus, buff with a scarlet throat. Still tops as exhibition varieties, Florence Nightingale proved to be an excellent commercial as did Pactolus, with Boldface gaining popularity as a choice cut flower.

"Soft, delicate Evangeline, pure orange colored Circe, brilliant scarlet Red Wing and creamy white colored Reg. Leahy highlighted the year of 1948 and will continue to do so for many seasons to come.

"The check plot of about 100 standard and previously tested varieties was grown under exhibition culture and exhibited in 13 major gladiolus shows, winning over 300 blue ribbons and special awards including 5 grand championships. Outstanding items of this check plot were Boldface, Circe, Cotillion, Evangeline, Florence Nightingale, Leading Lady, Mid-America, Patrol, Polynesie and Boise Belle."

Showy Acidanthera

to dress-up your outdoor garden!

The **Sweetly Scented MURIELAE** is an entrancing introduction from Western Abyssinia! Utterly delightful in the garden, it blossoms through most of August and September, scenting the air with its delicious fragrance! Masses of six or more showy blossoms are suspended on strong, graceful stems, and as you will note in the photo at the right, they are of a fascinating shape! White as a driven cloud, these lovely things flaunt a starry shaped throat blotch of crimson maroon. They are from 3 to 4 inches across, and excellent for cutting. The *Acidanthera Murielae* grows from 2½ to 3 feet in height and is rarely damaged by wind or rain! Extra choice, you handle this the same way as gladiolus, only don't plant it in the Spring until the ground has warmed up! It's definitely extra choice and very lovely!

Brilliant Bessera

for summer garden charm!

The bell-shaped **ELEGANS** from Mexico is known by many as "Mexican Coral Drops". Colorful in the extreme, but dainty as can be, too. The blossoms are a clear, coral-red on the outside, with an interior of sparkling orange, splashed with broad, creamy stripes! It quite suggests a burst of miniature rockets, and will call forth considerable admiration when blooming in your garden! Loose, bell-shaped umbels of 5 to 10 blossoms are borne on 20-inch stems, and the flowering continues for about two months, usually from July through the last of September. It is excellent for cutting, too! Late Spring planting is best, in light soil where it will get the sun. Harvest it in the Fall and keep dry until the next Spring so that you may enjoy it for many seasons!

Agapanthus—native to Africa

**spectacular bedded in southern gardens
stunning in large pots or tubs further north**

Widely known as the "Blue Lily of the Nile", this enchanting thing is truly a cousin of the true Lilies! Beautiful and far from the ordinary, yet easily grown, it is ideal for the conservatory, the window garden, the living room, the terrace, or in protected spots in the open. It will continue to bloom freely and beautifully every summer year after year, if given a large enough pot up north, or enough room, down south . . . plus plenty of food and water! And quite as a matter of course we send Full Cultural Instructions along with your orders, just as we do with everything else we present for your delight!

The Original "Lily of the Nile", or "Blue African Lily"

UMBELLATUS (*Orientalis*). Small wonder that our parents, and our grandparents have cherished this most decorative plant! Lovely, light blue flowers, 10 to 30 of them to each handsome umbel! And the flower scapes rise gracefully some 2 to 3 feet above rosettes of dark green, strap-like leaves! Vigorous growing, a rapid propagator and fine for cutting!

Delightfully, delicately fragrant, too, and borne on wiry stems which range from 12 to 18 inches in height. Very free blooming from July on through September. Excellent for cutting! In August, September and October they'll enchant you with bright apricot, fiery red, tawny crimson and gold! Each bulb produces several wiry spikes

with individual blooms measuring from 2½ to 3 inches across. They prefer a rich soil with liberal amounts of water, but are hardy in the north under a good straw mulch! One of the finest cut flowers!

Anemone Coronaria—dainty and bright

Well known, exceedingly popular and much admired as a cut flower you find at the florist's, the Anemone Coronaria is a wonderfully fine plant for your summer garden. In the south and west it is winter hardy, but in the north and east, it must be handled as a tender bulb (quite the way you handle Gladiolus). It is of easy culture, prefers rich, moist soil and plenty of water during the growing season. Dainty, solitary flowers are borne from 12 to 18 inches high in colorful profusion above dainty fern-like foliage, over a long period of time, too. Plant in early Spring outdoors, and consider it, too, for greenhouse or conservatory.
